The table shows the estimation of ARMA(1,1) process with the skew Student-t distribution for marginal temperatures and the goodness of fit test for the standardized residuals. The temperatures are taken from the German Meteorological Service. We check the goodness of fit using Kolmogorov-Smirnov test, Anderson-Darling test, Neyman's smooth test of fit. All series passed the test with p-values larger than 0.05.

B Univariate marginal distribution of stock returns

The table shows the estimation of $AR(1) - EGARCH(1, 1)$ - skew Student-t distribution for marginal returns and the goodness of fit test for the standardized residuals. The stock returns are taken from Datastream. We check the goodness of fit using Kolmogorov-Smirnov test, Anderson-Darling test, Neyman's smooth test of fit. All series passed the test with p-values larger than 0.05.
